## Creepy Castle

### You will need

Kitchen roll tubes  
Black paint  
Spooky coloured paint  
A silver pen  
Pointy ice cream tubs  
A box  
Some PVA glue  
A glue stick

1

Paint your box and your two kitchen roll tubes in a nice spooky colour. Then leave them to dry.

3

You now need to glue the sections. Lay one of the boxes on its front then take one of the kitchen roll tubes and glue it on one side, quite high up. Glue the other tube on the opposite side about half way up.

5

Next take the black paint and fill in all the windows and the door. To make the castle look extra creepy you can paint some green slime oozing out of the tubes, windows and door.

Remember to ask a grown-up for help

2

Mix the paint and glue together well, then paint the tubs and leave them to dry.

4

When it is all dry, turn the box back over and using the silver pen draw some spooky windows and a spooky door onto it.

6

Finally, you need to stick the ice cream tubs to the top of the tubes. You can make the Creepy Castle as big as you like by adding more boxes and kitchen roll tubes!
