## Funky Birds Nest

### You will need

- Some string
- 4 Old plastic bowls
- Paint
- 2 Pompoms (1 big, 1 small)
- PVA glue
- Shredded tissue paper
- Orange card
- White stickers
- A tray
- A pen

1

Take three of the bowls and put a large bundle of string into each of them.

3

Turn the final old plastic bowl upside down on a tray and cover in the special gloopy string. Do the same with the other coloured gloopy string and leave to dry overnight.

5

To make the bird, take the two pompoms and glue them together. For the eyes, take the white stickers, draw a black dot in each and stick them on.

Remember to ask a grown-up for help

2

Add a different colour paint and a dollop of gloopy glue to each bowl. Mix well.

4

When it's all dry very carefully push the bowl out. You will then be left with a string nest.

6

To make the beak, cut a triangle from the orange card and stick onto the bird. Now stick the bird into the nest and add the shredded tissue paper around it.
