

Nina and the Neurons

Clean It Up

You will need

Print-outs
Small hand held fan
Sticky tape
Glue stick
Scissors (grown-up use only)
Small, ripped up pieces of paper to test your vacuum cleaner with

Remember to ask a grown-up for help

1

Cut out all your shapes, 'A', 'B' and 'C'. Be very careful as scissors are sharp. The lines to cut into are clearly marked on the print-out. Fold the flap inwards along the dotted line on top of the label.

2

Carefully fold shape 'A' into a tube, when the tube's aligned with the tabs and straight, secure in place with plenty of sticky tape. Take shape 'C' and carefully roll it up into a cone and hold them in place with sticky tape.

3

Take shapes 'C' and 'A' and place them together, with the tube sitting in the cone carefully secure with sticky tape.

4

Put sticky tape all round the cone to keep it nice and tight together. The cone should be facing downwards.

5

Fold shape 'B' around the handle of the small fan. Use a piece of sticky tape at the back to hold it in place and fold out all the little tabs.

6

Gently place the hand-held fan, with the tab attachments, inside the small rectangle, on the seams, in shape 'A'. Stick the tabs down with sticky tape.
