

## Nina and the Neurons In The Box

### You will need

Print-outs  
A small rectangular  
sticky note pad  
(minimum of 30  
sheets)  
Sticky tape  
Glue stick  
Scissors (grown-up  
use only)

Remember to ask  
a grown-up for help

1

First carefully cut out your pictures. As you cut the pictures out, lay them face down on the table. Put picture number two face down on top of number one, and so on.

3

Turn the Nina pictures over so they face upwards. Position picture one at the start of the notebook, one or two pages in.

5

Now hold the edge of the book and flick through the pages. You'll see the image of Nina moving!

2

Take the rectangular note pad and secure the sticky edge by putting sticky tape on it.

4

Open your notepad and position picture number one in a page, use a blob of glue to hold picture number one in place, repeat with all of the pictures.
