

Swashbuckle

## Hook Hand

### You will need

Modelling clay  
Paper cup  
Aluminium foil  
Pencil  
Sticky tape

1

Tear off a piece of foil and roll it up into a sausage shape.

Take one end of your foil and make it into a hook shape by bending it around the aluminium foil tube.

3

Turn the cup upside down and put the hook through the hole. Bend the straight part of the hook and stick it to the inside of the cup.

Now you're ready to go!

Remember to ask a grown-up for help

2

Place the bottom of your cup over the modelling clay and use the pencil to poke some holes through.

Wiggle the pencil inside the cup to make the small holes into one larger hole.
